# MG5 EV Long Range

Europe's first fully electric, fully loaded estate car

The new MG5 EV Long Range gives you more on every level. Whether you're taking off with the family or hitting the road on business, Europe's first fully electric, spacious and feature-filled estate gives you room for everything you need. There's also as much as 250 miles\* of range to get you there, as well as a host of features to

make the journey easier – including our innovative MG Pilot driver assistance technology.

One of the most reassuring features of the new MG5 EV Long Range is our 7 year warranty, giving you peace of mind journey after journey.

\*MG5 EV range is 250 miles on the new WLTP combined test cycle and 334 miles on the WLTP city test cycle.

# At a glance

## Big on space

We all need personal space, and the MG5 EV Long Range has plenty to offer.

Up to five passengers can travel in comfort, while the boot has ample room for everyone's luggage. There's 464 litres with the load cover in place, or 578 litres with it retracted. Drop the 60:40 folding seat and you've got 1,456 litres for everything from large boxes and bikes to sports gear.

## Big on range

Once you're ready to hit the road, the 61.1kWh MG5 EV Long Range battery can take you up to 250 miles\* on a single charge.

You won't spend too much time powering up either, with the battery able to charge from 10% to 80% in under 40 minutes, using a 100kW CCS rapid charger.

## Big on features

The MG5 EV Long Range keeps you connected and in control.

The 8" colour touchscreen features Apple CarPlay™, Android Auto™, reversing camera and sat-nav. Not to mention MG Pilot, our high-tech suite of driver assistance technology to give you more confidence and safety on the road.

# Built for business or leisure

The new MG5 EV Long Range is designed for everyday life, but it's by no means ordinary. With generous boot capacity and a roomy cabin, your passengers can relax while it easily handles the load.

Whatever you need to transport, the new MG5 EV Long Range takes it all in its stride. From suitcases to bulky boxes, musical instruments to double buggies, you can move more in one go. And if the load is larger than normal, just drop the back seats and take advantage of 1,456 litres of space.

The spacious boot still leaves room for back seat passengers, who can enjoy plenty of head and legroom, even behind a taller-than-average driver.

In the front seat, you can get comfortable with the six-way adjustable driver's and four-way adjustable passenger seats.

Plus, there's cloth upholstery on the Excite; or leather-style upholstery, heated front seats and driver's lumbar support on the Exclusive.

# Ready to go the distance

Once you load up, sit back and start your journey, the new MG5 EV Long Range can keep going for 250 miles\* on a single charge of the 61.1kWh battery.

When it's time to power up, you'll have 80% battery charge in just 40 minutes using a 100kW CCS rapid charger. Enough time for a quick coffee.

You can charge your new MG5 EV Long Range however it suits you. Charge overnight at home on a standard 7kW home charger; or if you need a boost while you're travelling, take advantage of the growing network of charge points

across the UK. You'll easily find the CCS and Type 2 ports in the front grille.

The MG5 EV Long Range has also been designed with smart features to make the most of your range. The three levels of regenerative braking increase efficiency and optimise battery charge. And with Eco, Normal and Sport driving modes, the MG5 EV Long Range can adapt to your journey and driving style.

\*MG5 EV range is 250 miles on the new WLTP combined test cycle and 334 miles on the WLTP city test cycle.

# Smart features for a more satisfying drive

From the electric powertrain upwards, the new MG5 EV Long Range is loaded with features that make your journey easier, smarter and safer.

## Drive easier

Keyless entry and push button start make setting off simple. On the road, the 8" colour touchscreen puts DAB radio, Bluetooth, USB ports, sat nav, air con, Apple CarPlay™ and Android Auto™ all at your fingertips - so you can keep track of the traffic in between your favourite podcasts or albums.

## Drive safer

Our advanced MG Pilot driver assistance technology gives you the added confidence of state-of-the-art warning and alert features. It includes Adaptive Cruise Control to maintain a safe distance from the car in front; as well as Active Emergency Braking, Lane Keep Assist, Traffic Jam Assist, and Intelligent High Beam Assist that automatically dips the headlights when they detect an oncoming driver.

LOW RUNNING COSTS

✓  
ZERO EMISSIONS

# Driving down running costs

Whether you're driving the family or on the road for business, you can look forward to low running costs with the new MG5 EV Long Range. In fact, at current electricity prices, you can cover each mile for just four pence.\*\*

Zero emissions means business and fleet buyers can benefit from a Benefit in Kind (BIK)\* rate of just 1%. That means that company car drivers make big savings and employers save on associated National Insurance Contributions (NIC).

The MG5 EV Long Range is also currently exempt from Vehicle Excise Duty (VED), the London Congestion Charge and ULEZ rates. So you can enjoy your freedom, while you do your bit for the planet.

\*From 6th April 2021 until 5th April 2022, full battery electric vehicles (BEVs, such as the MG5 EV), will pay 1% Benefit in Kind (BIK). The BIK rate is scheduled to rise to 2% for tax year 2022-23. All tax rates are subject to change by the UK Government.

\*\*A full charge (61.1kWh) will cost £10.51 at the UK average domestic electricity price of 17.2 pence per kWh. With a total combined range of 250 miles, this equates to 4.2 pence per mile.

# MG Pilot

The MG Pilot suite of high-tech driver assistance technology gives you added confidence on the road. A selection of warning and alert features assist the driver, maintaining safety and simplifying everyday driving.

## Adaptive Cruise Control (ACC)

Adaptive Cruise Control monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by reducing motor power or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

## Intelligent Speed Limit Assist

The car will actively detect speed limit signs and alert the driver of the current speed limit by way of a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.

## Intelligent High Beam Assist

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximise the use of high beam, making night-time driving safer, without the risk of dazzling oncoming traffic.

## Active Emergency Braking (AEB)

At speeds below 12mph, the car will automatically apply its brakes to avoid a collision with a vehicle, bicycle or pedestrian. At speeds above 12mph, AEB will reduce the likelihood or mitigate the severity of an accident.

## Lane Keep Assist (LKA)

Lane Keep Assist uses a camera to detect lane markings ahead and monitors the vehicle's position in its lane. When the function detects the vehicle is

about to unintentionally move out of its lane, it applies a subtle corrective steering input to keep the car within its lane. The driver may also select an alternative Lane Departure Warning, where the vehicle will warn the driver of an imminent lane departure by means of a visual, audible and steering wheel vibration but will not perform a corrective input.

## Traffic Jam Assist (TJA)

When Adaptive Cruise Control is turned on, Traffic Jam Assist continuously analyses the speed of the surrounding vehicles and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 35mph, the driver can activate TJA. The car will automatically follow the vehicle in front, controlling its acceleration, braking and steering within the same lane.

# Aftercare

---

## 7 year warranty

Lasting peace of mind comes as standard with every MG. The new MG5 EV Long Range offers the reassurance of our full 7 year / 80,000 mile warranty, which includes the lithium-ion battery.

Our warranty ensures that expert MG technicians will always be able to keep your car in the best of health. It's also fully transferable to future owners.

## MG Service Plans

To enjoy mile after mile of hassle-free motoring, you can avoid the worry of unexpected costs with an MG Service Plan. Your MG will be protected for up to seven years with a mileage range of your choice. And it will have the care and attention of the MG authorised repairer network, offering genuine parts and factory trained staff.

# Our family

The new MG5 EV Long Range is part of our dynamic, forward-looking family of cars.

We offer two other electrified models: the MG ZS EV full battery electric SUV, and the MG HS Plug-in Hybrid, our first plug-in hybrid SUV. There's also our fun, nippy hatchback, the MG3; plus the spacious MG ZS compact SUV and the impressive family-sized MG HS SUV.

All new MGs offer the reassurance of our 7 year warranty and the friendly expert support of our nationwide network of professional, experienced dealers.

## Book a test drive today

Get behind the wheel of the new MG5 EV Long Range and experience the space, efficiency and smart features first-hand. Book your test drive at your MG dealer today or online at:
